

### Hot Fix 6 Defects Fixed:

1. **TD# 24705: Nightly process to update listing records with modified user and office info is updating deleted records**  
Deleted listings are no longer modified by nightly propagation routines and thus will not be picked up by third party transfers and inserted back into their databases.
2. **TD# 31595: One Line CMA report email displays URL below email signature**  
When emailing the Quick CMA or One-Line CMA the link to the report is now displayed above the signature and is labeled "Quick Comparative Market Analysis"
3. **TD# 37567: IE8 only – on Report Editor, selected data fields are moving to top right corner of the page.**
4. **TD# 37579: An error occurs when exporting listing images if a read-only image file was attached to listings.**
5. **TD# 37856: If search includes ADOM field in criteria, the number of listing matches for that search on the Gateway home page is incorrect.**
6. **TD# 37882: IE6 only - Dialogue box for associating listings to client is not sized correctly.**
7. **TD# 38527: Count of "New or Updated listings" is not getting updated on the Gateway home page**  
The number of New or Updated listings for each search is now properly displayed on the Gateway home page. This count is the number of prospect search matches since the client last visited the Gateway or within the last 24 hours if the client has visited the gateway within the last 24 hours.
8. **TD# 38704: Vertical Scroll bar disappears from within the expando-view of a search results grid if a column width is manually changed.**
9. **TD# 39391: On the Agent Web Site home page, field labels are not displaying for featured property.**
10. **TD# 39557: On the Agent Web Site home page, field labels are not displaying for featured property, clicking the "Next" link on the Featured Property does not advance to the next image.**
11. **TD# 39648: Home page Inventory Watch links are not changing when switching from Office to Personal.**  
Inventory Watch links now reflect the selected mode. Additionally, the home page now remembers the last mode selected by the user and displays it by default.
12. **TD# 39737: When agent changes their Headshot image in Web Page settings, their Email Signature gets deleted.**
13. **TD# 39772: Making a second change to a contact record displays a warning that a contact with the same email address already exists.**  
If a change to a contact record is saved, and then a second change is made while remaining on the Contact Info edit screen, this message will no longer display when the Save button is clicked.

14. **TD# 39971: An error occurs when selecting a client in the Select Email Recipients dialog if the client's name contains an apostrophe.**
15. **TD# 39943: The "Associate to Client" option is a MLXchange Pro-only feature, but the link is visible on the Details page for MLXchange Standard users.**  
This option is no longer displayed on the listing details screen for non-Pro users.
16. **TD# 40017: Printout of the Map view does not include the status-colored pushpins; only the numbers print.**  
Printing the map now prints the colored pushpins for each property, as well as the listing numbers.
17. **TD# 40059: In listing maintenance, pick-listed fields set to display Description only do not get populated via tax autopop.**  
All fields set to auto-populate from Tax data now populate, regardless of whether they are set to display short code, long description, or both.
18. **TD# 40063: IE8 only: an error occurs if the user tries to scroll up/down expanded rows in a results grid if their browser window is sized too small.**
19. **TD# 40084: On Agent Web home page, the "No Image" placeholder displays twice if Featured Property does not have an image**
20. **TD# 40126: Attempting to create a new net sheet from the Net Sheets tab of the Client details results in an error.**
21. **TD# 40150: IE8 only: The location plotted on the map is not same as the location plotted by the user.**
22. **TD# 40166: Multi-row History reports display "No Data Available" message in print preview, but they do print correctly.**  
The print preview of History reports now matches the printed output.
23. **TD# 40408: On the Open House search results grid, the camera icon usually displays "no photo available" but sometimes displays a photo for a different listing.**  
The camera icon has been removed from the Open House search results grid because listing images are not available in Open House data. Images for each listing may be viewed via the Listing link on the Open House details screen.
24. **TD# 40375: After emailing listings from the system, the Email Confirmation screen no longer displays the ML numbers of the listings that were sent.**  
This issue was introduced with Hot Fix 5 and is now fixed; the list of ML numbers that were sent now displays in the Email Confirmation as it used to.  
**Special Note:** Fix provided as a patch to HotFix 5.
